Omerga

Dr. Sawant P.L.

Dept. Of Zoology

B.Sc. III

Ecology

# Abiotic Environmental Factors

1. Temperature=
2. Concept,
3. Temperature fluctuation in different environment.
4. Range of temprature tolerance
5. Effect of temprature on animals
6. Thermal adaptation

- Light=
- Concept
- Light variation in different environment
- Effect of light on animals
- Adaptation to salinity and moisture

# Biotic environmental factors

- Composition=
  - Definition
  - Types
  - Intraspecific and interspecific composition
- Predation=
  - Definition
  - Characteristics of predation
- Commensalisms=
  - Definition and examples
