Certificate Course in Disaster Management

Course Code – CCDM01

INTRODUCTION:

A disaster is a destructive event that occurs suddenly and involves loss of life and property. Disasters can be of two types, natural and man-made. It is a sudden accident or a natural catastrophe that causes great damage or loss of life. Earthquakes, volcanic activity, tsunamis, floods, cyclones, landslides, avalanches and droughts are natural disasters and man has no control over them. They are a result of natural activities and hence known as natural disasters. The man-made disasters are triggered by human beings. Some of the man-made disasters are: bomb explosions, terrorism, war or civil war, leakage of poisonous chemicals, breach in dams, air or water pollution, industrial accidents and epidemics. They are known as man-made disasters because they occur due to human actions and not natural forces.

Department of Geography has separate Board of Study to frame the syllabus and to monitor the course on Disaster Management. The committee met in the meeting at IQAC cell and discussed the issues on GST certificate course. The structure of the committee is
