Health Camp programme for Village students

(05th Jan. 2018)

Report: 2017-18

Good health is central to human happiness and well-being that contributes significantly to prosperity and wealth and even economic progress, as healthy populations are more productive, save more and live longer. For a healthy life cycle, you need a healthy and balanced diet, good hygiene habits, staying in a proper shelter and getting enough sleep. Keeping in view the above **Health Mantra**, A health camp was organized on 05th January 2018 in order to create awareness among the college youths regarding various diseases like malaria, cholera, measles, cold, fever and other infectious diseases.

Importance of Good Health in Human Life

On the occasion Dr. Deepak Phophale spoke about the importance of good health in human life. He further said that Health is the body's functional and metabolic efficiency, and its ability to adapt to the physical, mental, and social changes that it is exposed to. Health is the opposite of disease, and also means the safety of the body from physical, social, and mental disorders. Health is the factor that helps a person perform his daily life tasks in a correct and right way. A person's physical health means that the body does not have any diseases in all parts of his body, and the safety of all its membranes.

Dr. Sanjay Aswale in his presidential speech said that A healthy person is a person who is able to serve himself, his nation and his community. An unhealthy person who suffers from illness sees him weak and meager, unable to properly carry out the duties and responsibilities incumbent on him. When the disease develops, the person becomes dependent on other people and cannot meet his different needs in life, which affects his psyche as well due to his sense of helplessness and weakness.

- Society is also affected by the presence of the disease among its members, as
- the productivity of these patients weakens and they become dependent on society.

For the success of the health camp village sarpanch, deputy sarpanch, police-patil and villagers were present. A total of 110 students got benefited from this camp.

Self Defence Training Programme for Girls
20 January 2019

Self defence training programme was conducted for girls on 20th January 2019. The programme aims at making girls physically and mentally fit to fight against injustice activities taking place in society. Women, who are always referred to as the weaker sex when it comes to physical strength, are considered easier targets and are victims of crimes like sexual assault and domestic violence frequently. In a society where crime against women has increased unexpectedly in the past few years, it has become an absolute necessity for women to be able to protect themselves from undesirable situations.

Self defence training programme for girls was organized in association with IQAC and life Long Learning Department. Ku. Rohini Bansode demonstrated some KARATE skills. After demonstration she motivated the girls by saying that Self-defense is all about preparing oneself physically and mentally to face any adverse situation. But most of the time people are confused about the kind of self-defense technique they should learn. If this is what you are worried about, then we are here to help.

Through her speech she encouraged the girls to face all social odds.

Sub: Seeking permission for "Cyber Safety Awareness" Presentation

Respected Sir/Madam,

Quick Heal Foundation is an independent entity of Quick Heal Technologies Ltd, implementing Quick Heal CSR activities all over India. This organization has been registered under Societies Act/ Trust act. "Cyber Safety Awareness" is an effort by Quick Heal Foundation across India, working together with college students, to put into effect better practices and safeguards to combat cyber-crimes. The mission of this project is to keep the kids safe online.

As kids grow up in this digital age, keeping up with the latest trends and technology is a part of everyday life. Parents, on the other hand, are oftentimes less savvy than their kids when it comes to cyber behavior. Due to lack of cyber awareness many crimes are happening online and is bound to increase drastically in near future. Having sensed the potential online danger, Quick Heal foundation has taken an initiative of CYBER SAFETY awareness program among the school kids.

Seeking your permission for the approval of CYBER SAFETY awareness program in your school. This program will give students the knowledge about online safety and preventive measures. The program requires 45 minutes' session. The presentation is for groups: Std. 5 - 7, 8 - 10 junior college and senior college students.

Looking forward to a favorable response from you.

Thanking you,

Yours Truly,

Talking about the relationship between the Central Government and the State Government. He expressed his views on the subject of Central-State relations in the Indian Constitution. It was expected that the federal system adopted in India should be based on co-operative federalism. But he said the growing controversy between the Center and the state in India needs to be considered. Both the Center and the state should adopt the path of development through coordination, but more emphasis is placed on politics rather than central-state coordination. He argued that the dispute between the Center and the state was increasing. There is no coordination between different parties in both the central and state governments. He also expressed the view that the misuse of Governor, misuse of article 356, discrimination in respect of financial subsidy from the Center to the states was not conducive to healthy federalism. He also argued that the role of political parties is important in politics. A political party is a mechanism that drives democracy. Therefore, the view of political parties should be broad. The political parties should give the ticket to the people who are good person. So good representatives will be elected.

. He addressed the issue of the criminalization in Indian democracy. He argued that criminalization of the increasing in Indian democracy is a dangerous thing for representative democracy. There is a need to raise awareness among the Indian people on this issue. The criminalization of politics needs to end. Besides, he also made clear his role in the Indian political system on issues of corruption, Communalism, Casteism, linguistics, regionalism are challenges before national unity. Corona virus awareness/prevention program organized by Department of Chemistry and Industrial Chemistry.

Corona virus disease (COVID-19) is an infectious disease caused by a new variable of the *Coronaviridae* family. COVID-19 spreads primarily by contacting the virus either from a COVID-19-infected individual through coughing or sneezing or from COVID-19-contaminated surfaces. On March 12, 2020, the World Health Organization (WHO) announced COVID-19 as a pandemic. The government of India has taken quick and serious precautions. The Ministry of Health (MOH) has made the public aware of the virus transmission patterns and the importance of quarantine and curfew. Despite strict measures taken, the awareness of people towards infectious viruses remains the most important factor in limiting the widespread of diseases.

Since the few early reported cases, awareness programs have been initiated by the Ministry of health (MOH) to educate the public about the virus mode of transmission and the importance of curfew. Also, strict measures have been imposed by the MOH to control the virus transmission, including limiting outdoor activities, suspending schools and minimizing social contacts and banning temples, Church, mosques prayers. However, it appeared that understanding the mode of transmission between humans is the more immediate need at this stage. Therefore, considering these facts of more emphasis on public awareness needs to be implemented in order to be ready to stand against the pandemic.

The role of teachers in increasing students' awareness, health protection, moral, and value aspects through the e-learning is important. To create/increase the general level of awareness for COVID-19, Our **Chemistry Department** conducted two online Corona viruses' quizzes to aware the peoples in society. In this quiz, the questionnaire was designed in accordance with previously published literature.

The questionnaires were distributed online using Google Forms. The questionnaire consisted of various types of questions including pictures to create interest regarding awareness and prevention of COVID-19 disease, not only for adults but also for children's. There was huge response among the peoples from different states. All the respondents were from different age group and from different educational level. There was

a system that after solving quiz all the participants/respondents will automatically receive their certificates with score on the provided mail id.

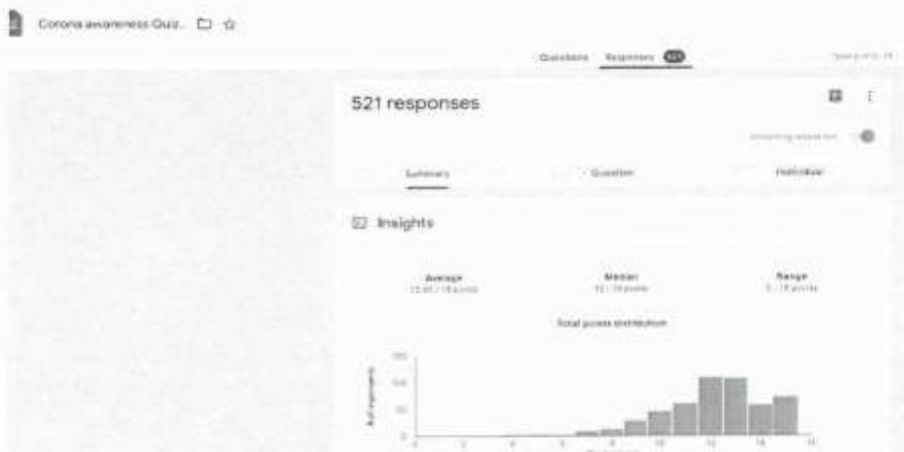

The results of the current activity are consistent with what it confirmed that the teacher is increasing their students' awareness through using the technology effectively, including distance learning.
